01. What is Infrastructure as Code ?

Definition

01. What is Infrastructure as Code ?

«Infrastructure as code (IaC) is the ability to provision and support your computing infrastructure using code instead of manual processes and settings.» [AWS](#)

Configuration file

02. Introduction to Terraform

Specify Terraform settings, such as required providers

```
terraform {  
  required_providers {  
    aws = {  
      source = "hashicorp/aws"  
      version = "~> 4.16"  
    }  
  }  
  
  required_version = ">= 1.2.0"  
}
```

Define a component of the infrastructure

```
provider "aws" {  
  region = "us-west-2"  
}  
  
resource "aws_instance" "app_server" {  
  ami = "ami-830c94e3"  
  instance_type = "t2.micro"  
  
  tags = {  
    Name = "ExampleAppServerInstance"  
  }  
}
```

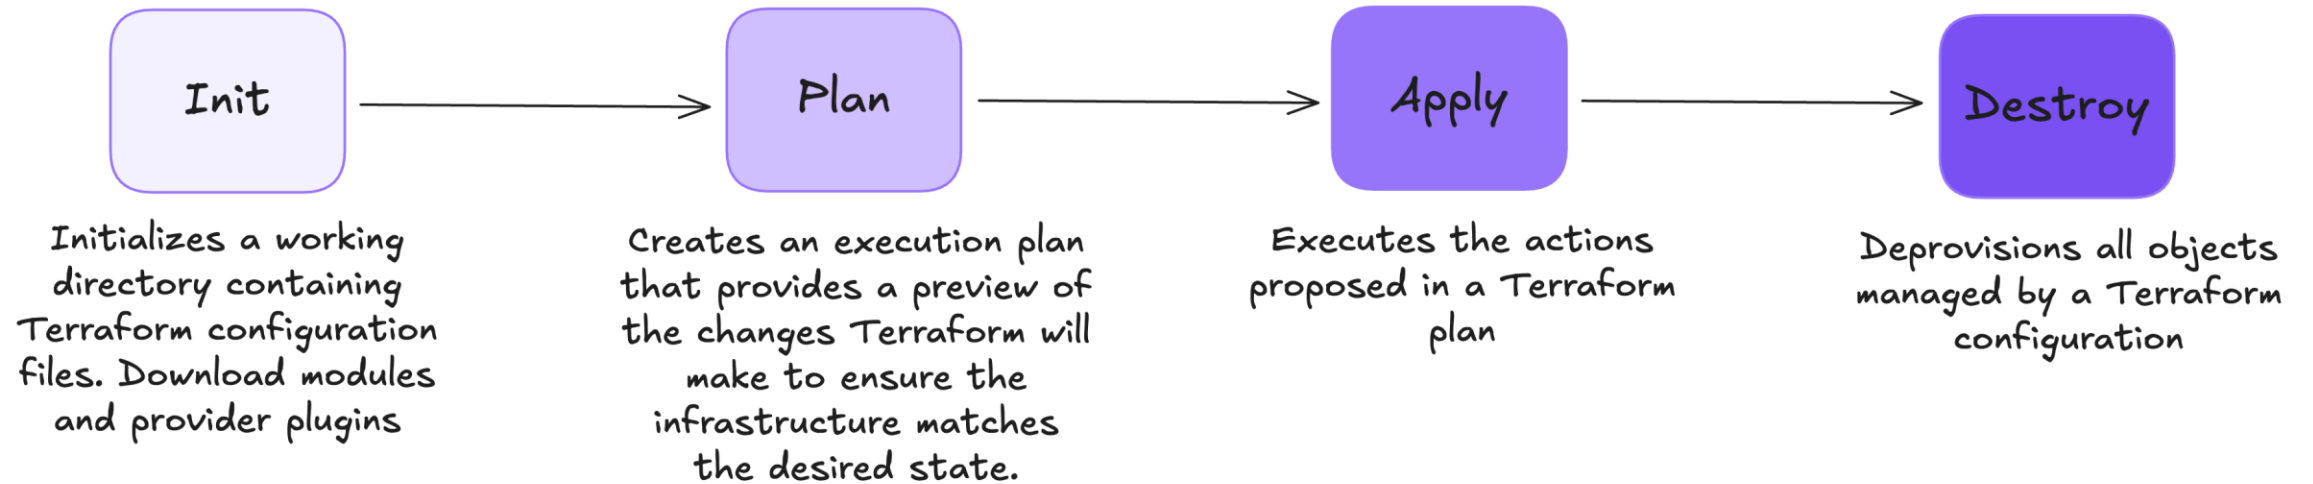

Configure a provider
